

... but only For A Night

After a married business woman accuses a powerful financial titan of sexual assault, she's determined to regain the life she's built while saving her fledgling firm. Married actuary Michelle Baartman decides to sojourn in the city where she meets an unassuming British businessman at a bar. The night glides on as they talk, drink, flirt and fantasize until hours later when she's found sexually assaulted in her hotel room.

After refusing to press charges or seek medical attention Michelle arduously presses on with the life she once led, until the residual effects of that night begin to rear its dismal head, and the man she fortuitously met on a blissful night at a Manhattan bar suddenly reemerges and throws her entire existence into a conundrum.

"Night" plunges into the abyss of sexual assault and the ever growing phenomenon of social media, conservative pundits, bloggers and the like who've turned the once sadistic and heinous crime of rape into a "dog and pony" show for the masses. While in the mean time, two unsuspecting individuals are left to pick up the pieces of their convoluted lives and come to terms with the

personal reasons that precipitated their encounter with each other on that very fateful NIGHT.

One night, one drink, one fault... but whose?
